PROJECT DETAILS

1. Mini Cart (E-Commerce Feature Project)

This is a small-scale project that simulates a real e-commerce shopping cart.

Objective: To implement add-to-cart, remove-from-cart, and checkout functionality in a simple web interface.

Tech Stack: HTML, CSS, JavaScript .

Key Features:

- Users can browse a list of products.
- Click to add items to the cart.
- See total price and quantity dynamically update.
- Option to remove individual items or clear the entire cart.

2. WebVion (College Events Web App)

A web application to showcase all events, workshops, and seminars happening in your college.

Objective: To centralize event information for students and make event registration easy.

Tech Stack: HTML, CSS, JavaScript .

Key Features:

- Event listing with search and filters (e.g., cultural, technical, sports).
- Registration form for students.
- Admin dashboard to add/edit/delete events.
- Responsive design for mobile and desktop.
